PARADE OF HOMES, SPRING 2007

This Claeys Construction Model features a Speakercraft Multi-Zone Audio/Video System. Claeys Construction has partnered with Total Audio Video Systems, Inc. (TAVS) to offer a distributed music system throughout this Parade of Homes Model at Fountain Oaks. The Speakercraft MZC will distribute audio from a Speakercraft AM/FM Tuner, a Yamaha Receiver and CD Changer and an iPod, independently throughout the home and out onto the patio. The system allows for expansion should the homeowner wish to add an XM tuner or additional iPod bases.

Speakercraft In-Ceiling Speakers are subtly placed throughout, with each room featuring a lighted Keypad that controls the source selection and volume for that area. The Family Room/Kitchen area Keypad has been upgraded to a MODE (Music On Demand Experience), an elegant full color screen interface that allows the resident to scroll through a colorful menu and select a particular artist, song or genre.

The Media Room is the centerpiece of the system and of the home. It boasts a 58" Panasonic Plasma, as well as a Viewsonic LCD at the Bar, with 5 precisely aimed Tannoy Speakers discreetly providing Surround Sound along with 2 powerful Klipsch In-Wall Subwoofers, which have been painted to blend into the wall. Satellite receivers and a DVD Changer, along with the audio equipment, are neatly tucked away into a Custom Middle Atlantic Pull-out Equipment Rack within a built-in area above the 2-sided fireplace. All of the features in the room are controlled via the new Rti T2C hand-held full color LCD Remote.

The Patio music is distributed through In-Ceiling Speakers that are tolerant to heat and humidity and 2 Speakercraft Rox (rock) speakers that inconspicuously provide music to the edges of the backyard. A Viewsonic LCD is mounted above the outdoor fireplace.

Ask your Claeys representative or call Total Audio Video Systems about designing a system for your home.
